Telescopic Tread Leveler - offered to make leveling fast and easy! Simply bolt the steps to the steel walls and adjust the telescoping levelers to the correct level.

Strength and Durability - Fibreglass technicians with state-of-the-art laminating equipment ensure full control in directing the polyester laminate to all critical areas of the step. This maintains a completely engineered product.

Structurally Stronger - Fibreglass laminate is structurally a stronger, sturdier product than co-extruded material.
