A-B TRIANGULATION INSTRUCTIONS

Step 1:

Position 2 stakes (A & B) at a minimum of 10 ft. apart as shown on the shape page. When positioning the stakes make sure that they are parallel to the longest length of the pool and at least 3 ft. away from the pool.

*Note: Do not remove until the Liner has been installed

* If A-B stakes are placed in a different position as shown on the shape page, please indicate.

Step 2:

Define the break-off and pad with measurements from these stakes.

Step 3:

Define the shape of the pool by taking measurements, approximately every 2 ft., around the perimeter of the pool.

*Note: Decrease the distance between the points you are using to about 1 ft. around the reverse radius.

Step 4:

Fill in the other measurements required as indicated by the boxes provided

Step 5:

Measure Perimeter: Perimeter must be taken as continuous measurement at the bead receptor.
